

EXTRAORDINARY HEAT

Unique chef interface allows you to cook with ease.

How does it work?
The parabolic mirror concentrates direct sunlight onto the cookware for instant heat reaching 550F.

Advance self-healing polymer maximizes the effectiveness of the reflective mirrors, ensures durability and it is easy to clean.

Sturdy construction for everyday use.

SolSource Solar Cooker

SolSource Solar Cooker is the ultimate solar cooker. Its innovative design allows you to capture sunlight to give you extraordinary heat - you can **cook** healthy and delicious meals outdoors and indoors, **boil and purify** water for drinking, **sterilize** jars and utensils for food conservation, and **heat water** for domestic use for outdoor living or during power outage.

Perfect for off grid cooking and sustainable living.

Ideal for cooking delicious dishes - pollutants free.

Compact storage and easy assembly for survival and disaster preparation.
